**Re: Evergreen Liquid Plant Products (see annex)**

Thank-you for submitting to us the formulae for the agricultural inputs listed in the annex to this letter. Ecocert Canada has reviewed the declared formulae for these products against the National Standard of Canada on Organic Production Systems and Permitted Substances List (CAN/CGSB 32.310-2006 and CAN/CGSB 32.311-2006).

We have verified that all the declared ingredients appear on the PSL Canada, section 4.2 and 4.3 (see attached ingredient verification table). We have also verified that the declared processes used in the manufacture of these products (and their ingredients) are compliant with section 1.4.1. of CAN/CGSB-32.310-2006 (reprinted August 2011).

As a result, Ecocert Canada considers that the products listed in the annex can be used in agricultural production that is certified to the Canadian Organic Standard, as crop production aids and fertility amendments.

The Canadian Standard notes the following restrictions regarding use of such a product:

- See restrictions listed in the annex to this letter.

We have received a signed contract from your company, "Evergreen Liquid Plant Food", in which you declare that all products marketed under the names listed in the annex to this letter are made according to the formulae referred to above.

Sincerely,

**Simon Jacques**, Input officer, Ecocert Canada.

Organic producers should check with their certification body before using any inputs. This letter does not constitute a certification or an approval of the input, nor does it imply any regulatory oversight.

**Annex: Evergreen Liquid Plant Food Products**

The following product formulae were reviewed by Ecocert Canada according to the review letter dated December 18, 2014. Not valid without the attached review letter.

<b>Product Name</b>	<b>Proposed Use</b>	<b>Usage Restrictions</b>
